

Packing Regulations for Suppliers

PVS Kunststofftechnik

These Packing Regulations for Suppliers are an addition to the “Guidelines for Suppliers”.

1 General Provisions

Only undamaged packing may be used. Deliveries in damaged packing – including pallets and barred boxes – will be rejected and shall be repacked at the Supplier’s expense after prior announcement of the Purchasing department.

2 Pallets

Type of pallet: Preferably euro-pallets, expendable pallets may also be chosen (1,200 x 800 mm); half expendable pallets (800 x 600 mm) for smaller quantities.

Maximum height: 1,800 mm including pallet and transported item.

Maximum weight (loaded): 1,000 kg; 950 kg for expendable pallets; 700 kg for half expendable pallets. Other provisions: any partial packing must be bandaged to the pallets. Mixed deliveries shall not be permitted.

3 Barred Boxes

The use of barred boxes should be avoided.

4 Very Small Packing Units

4.1 Disposable packing

In order to enable the recycling of the packing after its use, it must bear the recycling symbol.

Basic size: all packing units to be transported must correspond to the external dimensions of a euro pallet (1,200 x 800 mm) or part thereof (half/quarter/eighth euro-pallet).

Maximum height: variable, limited only by the maximum height of a loaded pallet (see Section 2).

Maximum weight (loaded): 15 kg; marking: the “Guidelines for Suppliers” shall apply to the marking of the deliveries.
